ERGONOMICS, HYGIENE AND LONG TERM DESIGN THE LOXOS SIGNATURE

In this new brochure, you will discover the essentials of our hospital range, which have equipped an infinite amount of hospital facilities in France and abroad since our creation in 1991, as well as our latest innovations, Betamobil and Mobilmat. You will also see that we know how to adapt to particular constraints and offer a wide range of custom fit solutions. Most importantly, we have included feedback from our professional clients, nurses and midwives for your information. You will also understand our corporate commitment to developing a meaningful CSR policy and implementing a more sustainable activity. All our furniture is recognised and appreciated for its durability, because all the components used in its manufacture have been selected after careful deliberation. Durability is our hallmark, it allows a better and long lasting equipment.

Nowadays, giving a second life to products is becoming more and more valuable. Because our furniture has proved to be very long lasting, we were able to retrieve 27 changing stations installed in Courlancy Clinic, Reims (France) 17 years ago, which will soon fit out a hospital in Dakar. Please turn to page 15 to discover the whole story.

It gives us great pride, and illustrates the fact that sustainable production makes sense for all our stakeholders. Entrust us with your projects, place your faith in our know-how and our experience, let's work together to equip your facilities with respect and trust. Together, we can cooperate to help welcome your patients in safe conditions and with respect for our environment.

Best Regards.

Juliette Rapinat - Freudiger
Chief Executive Officer

DISCOVER

MADE IN
FRANCE

LOXOS

listening to your needs

Whatever the context of the project (tender, private public partnership, design and build or direct order), Loxos pays particular attention to the preparation and the follow-up of the orders to ensure end user satisfaction and on time delivery.

Gathering information on the choice of furniture adapted to professional use, as well as the choice of colours and options, is an impor-

tant part of the order processing. It ensures that the production complies with the specifications. This is why we always try to form a relationship with the end users, so that we can refine our proposals to suit their needs as accurately as possible.

In the end, our teams and our transporters are able to adapt to the often unstable schedules encountered at the end of the project.

LOXOS

Observes users

Understands needs

Designs innovative solutions

Meets Early Childhood standards

Manufactures and assembles in France

Uses sustainable materials

Benefits from 30 years
of user experience

THE INIMITABLE

A RANGE WITH A FINE-TUNED DESIGN THAT INTEGRATES WITHIN PROJECTS HARMONIOUSLY, WITHOUT COMPROMISING ON FUNCTIONALITY OR SAFETY

MATERNITY

To change or give a bath, in single or double bedrooms, paired two by two or in an island for nurseries. Complete with generous seating areas and mats designed for infants.

Alphamat
L 68,5 x D 67 x H 90 cm

Bétamat
L 101 x D 67 x H 90 cm

Omégamat
L 135 x D 67 x H 90 cm

PAEDIATRIC

Complete changing solutions with bathtubs -adaptable to the child's size- and comfortable changing surfaces. Large storage area on worktop for easy access to the medical equipment.

Pédiabain
L 130 x D 83/51 x H 90 cm

Pédiabox
L 155 x D 83/42 x H 90 cm

Pédiacrèche
L 170 x D 95 x H 90 cm

NEONATAL

Designed for intensive care, with comfortable bath and hand wash basin. Allows four-handed care by the doctor and the nurse.

Pédiamax
L 180 x D 88 x H 90 cm

Néonat
L 200 x D 59,5/85 x H 90 cm

MEASURING RODS

Practical and easy to maintain
A Loxos exclusive

Because our creativity and innovative capacity are our hallmark, **our models are registered at the WIPO.**

CLASSIC COUNTER TOPS

A RATIONAL AND EFFICIENT CUSTOM FIT SOLUTION,
WITH A SIMPLIFIED DESIGN

Easily install wall-to-wall furniture in an alcove, provide a worktop adapted to the specification of a delivery room, find a customised solution to meet some installation constraints...

We have simple and rational custom-fit solutions in our range of classic worktops. As we work in close collaboration with the project manager, we always find a solution to adapt to your specifications.

Standard 115
L 115 x D 65 x H 90 cm

Standard 145
L 145 x D 65 x H 90 cm

Standard 175
L 175 x D 65 x H 90 cm

Corner wash basin
L 65 x D 65 x H 90 cm

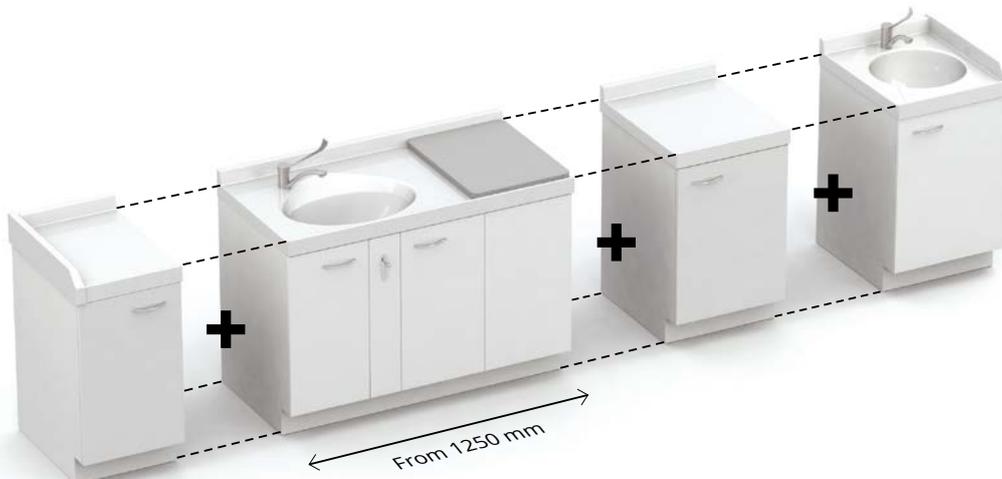

Straight wash basin
L 55 x D 65 x H 90 cm

Additional modules

SPECIFIC ARRANGEMENT

Choose the length and depth of your counter top, add a hand wash according to your needs.
Various depths available : 650 mm for infants, 800 mm for toddlers.

Find the full range of products on our website www.loxos.com

OUR INNOVATIONS

MOBILMAT

A CHANGING STATION WITH
ADJUSTABLE HEIGHT. FOR THE
COMFORT OF THOSE WITH
REDUCED MOBILITY

The worktop adjusts from 800 mm to 1050 mm. Can be used in sitting position as well as standing. In lower position, the worktop design complies with the regulation, allowing enough space under the nappy changing space as well as under the bath, for the wheel chair and the legs. When used in the highest standing position, allows to change or bath the newborn, without bending, for a better comfort.

Mobilmat
L 130 x D 75 x H 80 to 105 cm

"What I really appreciate with Loxos is their ability to deliver solutions adapted both to space constraints and professional specifications. In a renovation where the spaces have already been specified, the change tables adapt to us and not the contrary."

**Catherine Henry, Midwife
Tenon Hospital, Paris**

45 furniture have been installed in Tenon Hospital, including Mobilmat, with adjustable height

We developed Bétamobil with the collaboration of Necker Hospital in Paris, Neonatal service is now equipped with 5 mobile furniture

BÉTAMOBIL

BÉTAMOBIL IS A MOBILE CHANGING STATION WITH MULTIPLE USAGE AND EASE OF USE

When placed close to the incubator, it allows a quick bath and immediate return to the heated incubator.

Ideal to turn a medical bedroom into a maternity bedroom or to use in maternity facilities which do not benefit from changing stations in the rooms.

Bétamobil
L 122 x D 67 x H 93 cm

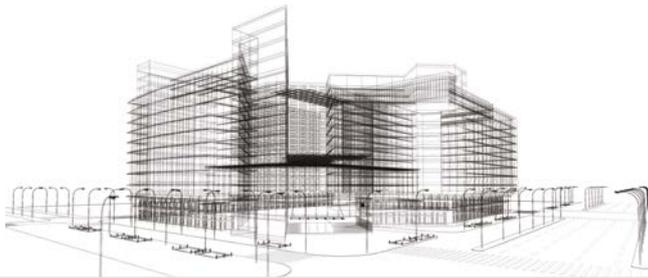

PRODUCT AND SERVICE *benefits*

WE ARE **BIM READY**

This marks a true evolution in the way of composing a design using reliable and carefully informed components. No surprises and no incompatibility thanks to objects described in 3D. Digital mock-ups have become indispensable, and Loxos makes use of the recognized skills of Polantis, a leading company dealing with object libraries, to provide its layout solutions for architect designers, as well as design offices and hospital engineers.

All our products can be directly downloaded in 2D CAD on www.loxos.com, 3D objects that relate more specifically to BIM can be downloaded through a link to the site www.polantis.com

↓ **BIM, 3Ds max, Révit, Sketchup, Vectorworks, Autocad, Artlantis, Rhinoceros, C4D, ARC+ , Wavefront advanced Visualizer...**

ERGONOMICS

The Loxos signature

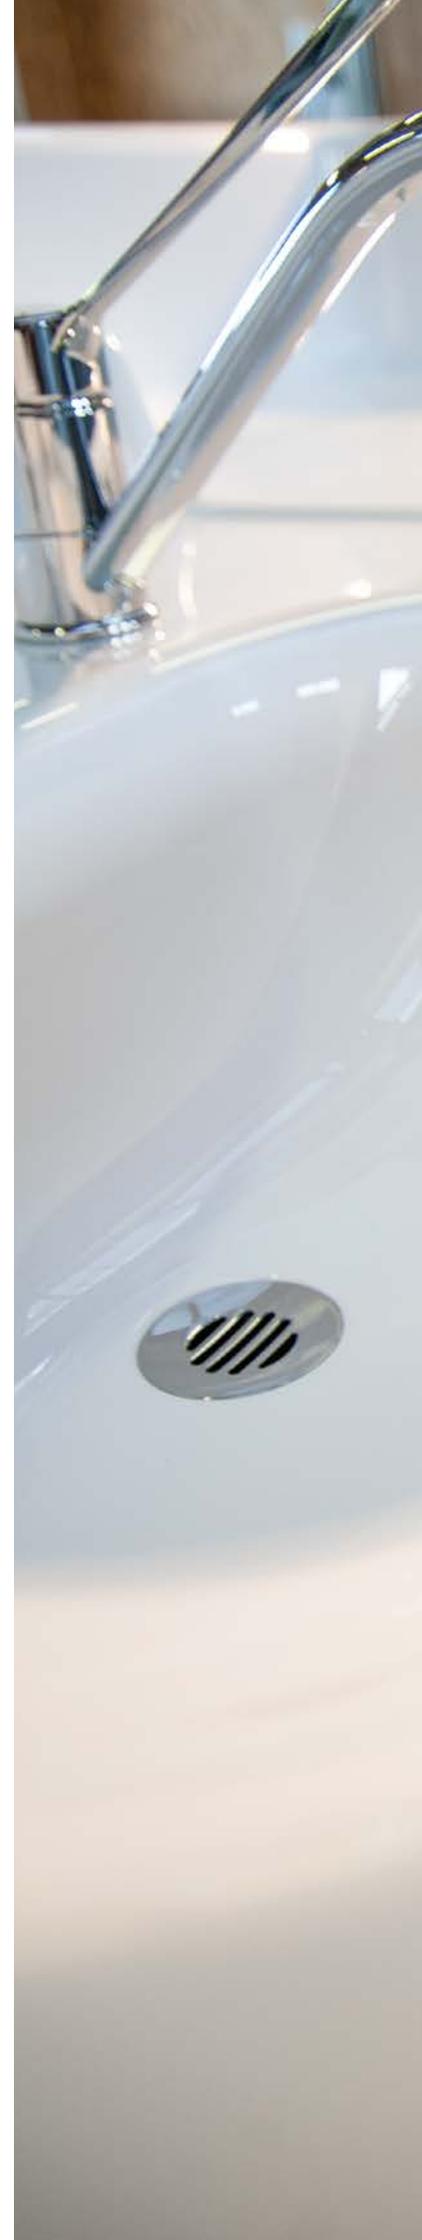

Numerous interactions with the professionals take place during the design phase of our new products. User experience and design thinking allow us to adapt our solutions to the ever changing professional practices of our clients.

In the maternity ward, the worktops are compact to limit the movements of the mothers during the recovery.

In intensive care, the worktops are more generous to allow for comfortable four-handed care around the mat.

In paediatrics, the bath easily adapts to the size of the child thanks to its modular bathtub.

The storage units are always separated and the resin profile holds the mat in place.

RESIN

Shine has always been associated with cleanliness

Loxos is the only company on the market offering thermoformed fireproof polyester resin countertops. PETG* offers a perfect shine and exceptional non-porosity, thus ensuring efficient disinfection in line with hospital cleaning protocols. This resin is used for the range of classic and maternity changing

units. Other furniture with more complex geometry is made from a fire-rated reinforced polyester resin, finished with a non-porous 15/10 gel coat, highly scratch resistant. In case of shock, these resins can be repaired using a kit provided upon request.

*PETG: Polyethylene Terephthalate Glycol

SANITARY FITTINGS

We have been relying on the expertise of the Delabie company and their R&D department for more than 10 years

We equip our furniture with the most efficient taps in terms of sanitary safety**, hygiene, maintenance and water saving. Delabie, a renown manufacturer within the healthcare sector, is present in more than 80 countries and can provide quality after-sales service on its 10-year guaranteed products

(excluding wear parts). Our furniture is also equipped with an upstream thermostatic valve located closest to the draw-off point, as well as an anti-scalding system. For more information, visit www.delabie.com

**Adaptation of other possible tap solutions possible upon request by the customer

LOGISTICS

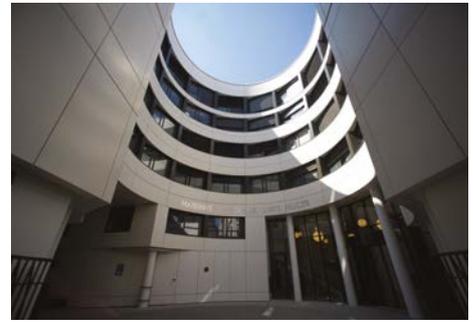

Before packing our furniture to be transported to its final destination, our quality control department carries out a thorough check of the furniture, paying particular attention to the fitting of the taps. The connection can then be made by the company of your choice or by your teams.

INSTALLING AND CONNECTING

The changing tables are pre-equipped at the factory with taps and supply and emptying hosepipes, which makes the connection operation very easy and fast.

ARRANGEMENT OF A *maternity room*

CATHOLIC MATERNITY SAINTE FÉLICITÉ

PARIS, FRANCE

Over **3000** births every year

11 birthing rooms

62 wards equipped and
connected by Loxos

WHY THEY CHOSE

OMÉGAMAT

- All-in-one changing station with bath, wash-hand basin and mat, acclaimed by hospital engineers
- Includes a generous area for nursing equipment
- Designed to fit neatly into corners or side by side. Edges are rounded for safe and comfortable use
- Changing station designed to be associated with another unit from the Maternity range (Alphamat, Bétamat)

"Having all the material necessary on hand while keeping an eye on the baby is a real benefit of this changing station.

Everything is easy to grasp and practical. As an example, the tap is high and handy, thus allowing easy and natural gestures while bathing the newborn."

Catherine Mie, Head Nurse

ARRANGEMENT OF A *nursery room*

MORGES HOSPITAL

SWITZERLAND

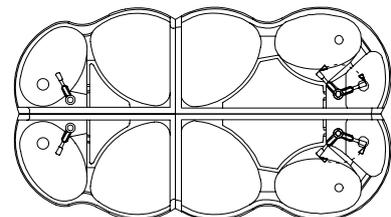

Over **1300** births every year

Full equipment of the nursery room

WHY THEY CHOSE

BÉTAMAT

- Changing station with bath and mat, within a small 1 meter footprint. An ergonomic solution to space constraints
- Designed to fit neatly into corners or side by side. Edges are rounded for safe and comfortable use
- Can be used to compose an island of 4 units or associated with another unit from the Maternity range (Alphamat, Omégamat)

ARRANGEMENT OF AN *intensive care room*

WHY THEY CHOSE

NÉONAT

- Changing station designed for intensive care, with a functional and spacious bath and hand-wash basin
- Wide changing mat allows for two people to care for a newborn comfortably
- Storage drawers and baby scale drawer as standard to allow intensive care accessories to be stored at hand
- Large storage area on worktop to ensure medical equipment is easily accessible

DEZARNAULD HOSPITAL

GIEN, FRANCE

766 births in 2017

Paediatric and maternity wards equipped

32 furniture installed

“Choosing PEDIABAIN seemed obvious to us, because of its wide and comfortable bath. LOXOS had rightfully suggested we opt for the 3 drawer block including one for baby scale. We now realise we should have followed their advice, thus avoiding an extra piece of furniture in the room.”

Christine Lafond, Head Nurse

OUR COMPANY'S *environmental* AND ETHICAL CONCERNS

CONVINCED THAT CORPORATE SOCIAL RESPONSIBILITY IS A GREAT LEVER OF INNOVATION AND TRANSFORMATION, WE ARE WORKING WITH ALL OUR EMPLOYEES TO IMPROVE OUR PRACTICES, TO FOSTER COOPERATION WITH ALL OF THE STAKEHOLDERS IN OUR ECOSYSTEM.

The French Fab was created in 2017 to promote the excellence of French industry internationally. We are proud to have joined this movement and to have worked to promote our expertise by equipping our customers with our made in France solutions.

Minimizing OUR ECOLOGICAL FOOTPRINT

All our furniture is manufactured with wood sourced from sustainably developed forests

Panels used in our cabinets have a volatile organic compound level lower than 8 mg

Our resins are reusable or recyclable and repairable

Our carriers retrieve packaging after delivery

Our buildings foster the natural light

All our carriers are ISO 9001 certified

All the components can be cleaned by bio steam

In our offices, we recycle and separate waste

FROM WORDS TO ACTION...

A second life for the Loxos changing units from the Courlancy Clinic

Originally, the restructuring of the Courlancy clinic near Reims (France) involved relocating the changing furniture, still in good condition after 17 years of usage to the new site, after revamping and updating the colours of the doors and facades. The operation required logistical organisation that was as expensive as simply replacing the furniture. In this context, the idea of re-using the furniture in perfect condition made its way to Loxos and the Courlancy management. In collaboration with Valdelia, which collects and recycles our furniture, the Horizon Sahel non profit organisation has been able to deliver 27 changing tables to the maternity ward of Dakar's main hospital in Senegal.

TECHNICAL FEATURES

GENERIC CHARACTERISTICS

CHANGE WORKTOP

- Height of the worktop: 900 mm.
- Single piece fiberglass reinforced thermoformed polyester resin M1 fire rated or laminated moulded resin fire rated M2.
- Smooth, seamless, non-porous antibacterial surface with rounded edges Ø 12 mm for ease of cleaning and sanitising.
- Designed to allow water to run to the lowest point thus avoiding water retention.
- Safe hygienic upstands.
- Recessed worktop ensures maximum mat stability.
- Change mat, M2 fire rated, PVC coated fabrics, phthalate-free, knitted finish, 12 colour choices.

FURNITURE

- Melamine faced particle board furniture, thickness 19 mm, moisture resistant grade. Fireproof to French M3 rating.
- White cabinets, coloured doors (12 colours) with colour-matched rounded outline solid ABS edging.
- Metal adjustable legs, with expanded PVC removable kick strip.
- Curved metallic handles.
- Drawers with fully enclosed runners with soft close action.

SANITARY FITTINGS

- Spout mixer(s) with elbow-joint lever (hospital standards). Ceramic cartridge, Ø 40, flow rate pre-set at 5 lpm. Solid chrome.
- Pre-set thermostatic valve. Ensures a mixed water distribution at constant 38°C nominal temperature. Adjustment of the temperature at water fitting.
- Water Anti-scalding security in case of cold water supply failure.
- Stainless steel sheathed flexible hose connection.

WATER DISCHARGE

- Water waste outlet fitted, with no overflow. Limits bacteria contamination risks.
- Offset controlled plug placed on facade for the baby bath.
- Free flowing plug with debris grid in the hand wash basin.
- Anti vacuum siphon on hand wash and baby bath.

CONNECTION

- Water inlet connection: 250 mm from finished floor level, 1/2" male fitting with isolation valve.
- Drain pipe: 40 mm diameter at 250 mm from finished floor level and centre to wall distance of 70 mm.

ALPHAMAT - REVERSIBLE

SPECIFIC ARRANGEMENT

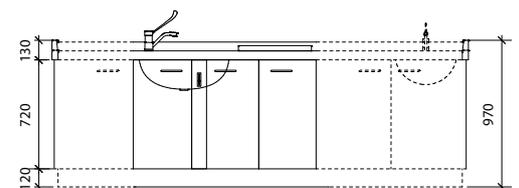

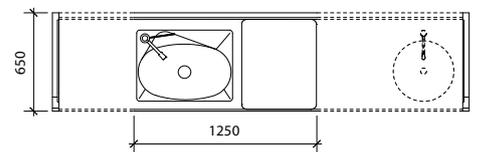

Choose the length and depth of your counter top, add a hand wash according to your needs. Various depths available: 650 mm for infants, 800 mm for toddlers.

- 1 bath
- 1 swivel spout mixer with long handle
- 1 mat

MATERNITY

L: from 125 x D 65 x H 90 cm

MEASURING ROD FOR MATERNITY

L 71,5 x l 23 x H 12,5 cm

Measures newborn from 25 to 57 cm

MEASURING ROD FOR NEONATOLOGY

L 60 x l 13,5 x H 11,2 cm

Measures premie from 26 to 50 cm

- Calibration in 1 mm increments
- Lateral graduation for easy reading
- Magnifier and locking knob
- Built-in handle for easy transport
- Rounded edges head piece
- Soft and flexible material
- Removable and bio clean approved

EOLIS AIR MANAGER

600/600S AND 1200/1200S

TECHNOLOGY

- Mototurbine, touch screen panel, high-quality filtration
- High-efficiency photocatalysis developed in collaboration with AFNOR Group

INNOVATION

- Real-time filter performance display
- Continuously monitor the air you breathe
- Continuous environmental air quality data log (each hour)
- ACTIV mode: smart unit automatically adapts to your environment
- Only for Eolis 600S and 1200S: Activ oxygen mode: eliminates 100% of odors

FILTERS

- Bactericidal virucidal acaricidal pre-filter certified EN1276, EN14675
- Medical-grade HEPA H13 or ULPA U15 filter (optional) certified EN1822
- Very High density activated carbon filter

SPECIFICATIONS

EOLIS 600/600S

- Airflow max (m³/h): 500
- Noise level min / max (dB): 18 ~ 52
- Fan speed: 5
- Power consumption min / max (W): 13 ~ 60-65
- Size h x w x d (cm): 50.5 x 38.5 x 23
- Weight (filters included): 8.9 kg

EOLIS 1200/1200S

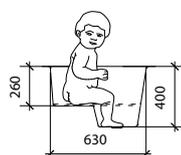

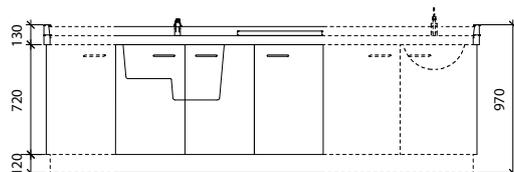

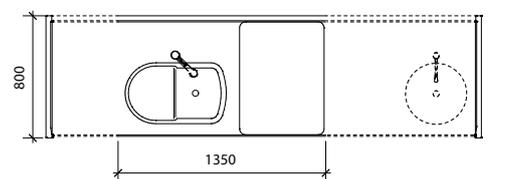

- Airflow max (m³/h): 850
- Noise level min / max (dB): 18 ~ 59
- Fan speed: 5
- Power consumption min / max (W): 16 ~ 75-80
- Size h x w x d (cm): 70.5 x 39.5 x 24
- Weight (filters included): 11.8 kg

OPTIONS

- Additional wash-basin module can be added in the counter top on both sides according to your specifications and feasibility
- Removable plastic waste bin with lid
- 3-drawer block including 1 for baby scale
- 3 drawer block
- 1 swivel spout mixer with handspray and long handle for the bath
- 1 swivel spout mixer with long handle for the hand-wash basin

PAEDIATRIC

L: from 135 x D 80 x H 90 cm

OPTIONS

- Additional wash-basin module can be added in the counter top on both sides according to your specifications and feasibility
- Removable plastic waste bin with lid
- 2 or 3 drawer block
- 1 swivel spout mixer with handspray and long handle for the bath
- 1 swivel spout mixer with long handle for the hand-wash basin
